

COVID-19 SCREENING PROCESS AND REMINDERS

For students/faculty in the classroom and/or lab setting:

Before a student enters a classroom or lab, faculty should ask the following questions:

- (1) Do you have a new or worsening cough?
- (2) Do you have new or worsening shortness of breath?
- (3) Do you have two or more of the following symptoms?
 - Temperature/Fever of 100.4 degrees Fahrenheit or above
 - Chills
 - Headache
 - Sore throat
 - Muscle pain,
 - Loss of taste or smell
- (4) Have you been exposed to anyone who has tested positive for COVID-19 within the past 14 days?

If **ALL four of the ABOVE are NO**, the individual can enter the program space. The individual must proceed to wash their hands before having any contact with other students or other staff/instructors.

If **ANY of the ABOVE are YES**, the individual **WILL NOT BE ALLOWED** to enter or nor participate and will be required to return home. They should then stay home until ALL of the following conditions have been met:

- They have had no fever for at least 72 hours (without the use of fever reducing medications)
- Other symptoms have improved (for example, when the cough or shortness of breath has improved)
- At least 10 days have passed since their symptoms first appeared
- It has been 14 days since they have been exposed to someone who has tested positive for COVID-19

If an individual becomes sick during the day, they should go home. If a student is asked to go home, faculty should report the incident to their supervisor immediately.

During activities:

- Wash your hands frequently with soap and water for at least 20 seconds.
 - If soap and water are not available, use a hand sanitizer that contains at least 60% alcohol.
- Cover your coughs and sneezes.
- Practice social distancing by keeping at least 6 feet of space between people.
- Wear a cloth face covering in settings where social distancing cannot be maintained.
- Monitor your health paying particular attention to the presence of a temperature or fever, new or worsening cough, and new or worsening shortness of breath.
